

Examples of Responsibilities of Governance for HIE Operation

Missouri

- Define clear and consistent goals for statewide HIE
- Define and adopt business, technical, operational policies that participants comply with as members
- Act as the agent for distribution of state and federal grant funds for statewide HIE development
- Ensure availability of statewide technology services
- Coordinate with the Missouri Regional Center
- Establish business models for a sustainable, self-financing statewide HIE

Tennessee

- Foster development of standards-based HIE technology that is vendor-agnostic and adaptable
- Develop privacy and security policies that engender trust on the part of patients, providers, payers, other data users, and data services

California

- Creating standards, certification requirements, and a technical plan that builds off existing assets and allows for broad access to HIE services that will support meaningful use
- Create policy guidance for privacy and security that is uniform, coordinated with federal policy, consistent, and widely supported by stakeholders
- Developing and implementing controls and reporting requirements
